

Seed Maximizer™ for Yield Boost

Chemical-Free, Energy-Free, Maintenance-Free.

Magnation's Seed Maximizer™ technology accelerates seed germination rates and supports stronger root structure and stalks. Proven to improve the quality of seeds, as well as their germination properties and growth, Magnation's clean and green technology reduces spending on sowing materials by 30-50%, improves uniformity and promotes earlier harvest ripening.

Treatments with Magnation's specialized field enhance seed vigor and disease resistance by influencing the biochemical processes that involve free radicals, and by stimulating activity of proteins and enzymes. Accelerated protein formation facilitates the growth of roots while

activating growth processes in weaker seeds. The end result are heavier weights, better quality and higher yields. Numerous studies indicate that specifically calibrated magnetic field increases ion's uptake and consequently improves nutrition value, suggesting a sustainable alternative for chemical treatments.

Boost your bottom line with Magnation.

Magnation® Seed Maximizer™ Benefits

- ✓ Earlier emergence & enhanced germination
- ✓ Increased starch and protein production
- ✓ Increased nitrogen nodules/soil credits
- ✓ Deeper, wide-spreading root structure
- ✓ Higher disease resistance
- ✓ Enhanced plant health
- ✓ Better absorption rate
- ✓ Reduced heat stress
- ✓ Improved uniformity
- ✓ Stronger stalks
- ✓ Bigger yields

Maximize Your Seed's Potential
